DESCRIPTION

The RetroFit Kit is an effective "Energy Saving Alternative" for today's environmentally conscious marketplace. This computer designed troffer reflector retrofit system has been carefully developed to produce comfortable, optimum lighting levels with energy awareness considerations. In today's marketplace where economics, energy awareness and conservation are key product specifications, the RetroFit Kit is the solution. This high quality RetroFit Kit can be a plus for any commercial, industrial, institutional and retail merchandising retrofit application, or the most progressive demand side energy management program. Fixture not included.
